

### REMARKS

Claims 1-17 are rejected under 35 U.S.C. §112, as being indefinite. This rejection is overcome in view of the amendments to claims 1-3, 10-12 and 17.

Claims 1-9 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (AAPA) in view of Silvester (U.S. 2003/0126335). Claims 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA in view of Silvester as applied to claims 1-3 above, and further in view of US Patent No. 5,768,163 to Smith, II (Smith). These rejections are not applicable to the amended claims.

Independent claims 1 and 17 include: the PDA chassis being ejectably connected to the PC chassis by means of an indented recess in the cover of the PC for receiving the PDA, the PC having a first connector in the recess, the PDA having a second connector for connection to the first connector when the PDA is mounted in the recess, whereby when the cover is closed and the PDA is mounted in the recess, operation of the PC is deactivated but the first and second connectors couple the PC and PDA so that the PC provides power to the PDA system permitting the PDA, including the PDA display, to function through the PC system.

As the PTO recognizes in MPEP §2142:

The Examiner bears the initial burden of factually supporting any *prima facie* conclusion of obviousness. If the Examiner does not produce a *prima facie* case, the Applicant is under no obligation to submit evidence of nonobviousness.

The USPTO clearly cannot establish a *prima facie* case of obviousness in connection with the amended claims for the following reasons.

35 U.S.C. §103(a) provides that:

[a] patent may not be obtained ... if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains ... (emphasis added)

Thus, when evaluating a claim for determining obviousness, all limitations of the claim must be evaluated. However, the references, alone, or in combination, do not teach the PDA chassis being ejectably connected to the PC chassis by means of an indented recess in the cover of the PC for receiving the PDA, the PC having a first connector in the recess, the PDA

having a second connector for connection to the first connector when the PDA is mounted in the recess, whereby when the cover is closed and the PDA is mounted in the recess, operation of the PC is deactivated but the first and second connectors couple the PC and PDA so that the PC provides power to the PDA system permitting the PDA, including the PDA display, to function through the PC system.

Therefore, it is impossible to render the subject matter of claims as a whole obvious based on a single reference or any combination of the references, and the above explicit terms of the statute cannot be met. As a result, the USPTO's burden of factually supporting a *prima facie* case of obviousness clearly cannot be met with respect to the claims, and a rejection under 35 U.S.C. §103(a) is not applicable.

There is still another compelling, and mutually exclusive, reason why the references cannot be combined and applied to reject claims under 35 U.S.C. §103(a).

The PTO also provides in MPEP §2142:

[T]he Examiner must step backward in time and into the shoes worn by the hypothetical "person of ordinary skill in the art" when the invention was unknown and just before it was made. In view of all factual information, the Examiner must then make a determination whether the claimed invention "as a whole" would have been obvious at that time to that person. ...[I]mpermissible hindsight must be avoided and the legal conclusion must be reached on the basis of the facts gleaned from the prior art.

Here, the references do not teach, nor even suggest, the desirability of the combination because neither teaches nor suggests the PDA chassis being ejectably connected to the PC chassis by means of an indented recess in the cover of the PC for receiving the PDA, the PC having a first connector in the recess, the PDA having a second connector for connection to the first connector when the PDA is mounted in the recess, whereby when the cover is closed and the PDA is mounted in the recess, operation of the PC is deactivated but the first and second connectors couple the PC and PDA so that the PC provides power to the PDA system permitting the PDA, including the PDA display, to function through the PC system.

Thus, neither of these references provides any incentive or motivation supporting the desirability of the combination. Therefore, there is simply no basis in the art for combining the references to support a 35 U.S.C. §103(a) rejection of the claims.

In this context, the MPEP further provides at §2143.01:

The mere fact that references can be combined or modified does not render the resultant combination obvious unless the prior art also suggests the desirability of the combination. (emphasis in original)

In the above context, the courts have repeatedly held that obviousness cannot be established by combining the teachings of the prior art to produce the claimed invention, absent some teaching, suggestion or incentive supporting the combination. In the present case it is clear that the USPTO's combination arises solely from hindsight based on the invention without any showing, suggestion, incentive or motivation in either reference for the combination as applied to the claims. Therefore, for this mutually exclusive reason, the USPTO's burden of factually supporting a *prima facie* case of obviousness clearly cannot be met with respect to the claims, and the rejection under 35 U.S.C. §103(a) is not applicable.

Therefore, independent claim(s) 1 and 17 and their respective dependent claims are submitted to be allowable. The amended claims are supported by the original application.

In view of the above, the allowance of claims 1-3, 10-12 and 17 is respectfully requested.

**PATENT**

Docket No.: 16356.753 (DC-02763)

Customer No.: 000027683

The Examiner is invited to call the undersigned at the below-listed telephone number if a telephone conference would expedite or aid the prosecution and examination of this application.

Respectfully submitted,

James R. Bell
